

Problem of the Day: Find the volume of the object.

Use your calculator to help!

$$V = \frac{4}{3}\pi r^3$$

$$V = \frac{4}{3}\pi \cdot 6^3$$

$$V = 904.3 \text{ yd}^3$$

Plan for the Day: Integer quiz (if needed)

Circuit for more practice with volume (or worksheet if you cannot stay quiet)

TEST THURSDAY!!

Objective: We will be able to find the volume of cylinders, cones, and spheres.

Today is National Pierogi Day!!
