

Problem of the Day: Solve the equations.

a. $7x - 4 = -31$
 $x = -5$

b. $-3x - 12 = -18$
 $+12$ $+12$ $-6 \div -3$
 $x = 2$

Plan for the Day: Go over yesterday's integer quiz

New daily integer quiz

More practice with solving two-step equations

Objective: We will be able to solve two-step equations.

Today is National Just Because Day!!
