

Problem of the Day: Solve the equation.

$$8x + 6 = 6x - 2$$

~~$-6x$~~     ~~$-6x$~~     $2x + 6 = -2$   
 $2x = -8$     $x = -4$

Plan for the Day: Collect POTD sheets

Get new weekly homework

Daily integer quiz (update and take new one)

More practice with solving equations with variables on both sides

Objective: We will be able to solve equations with variables on both sides.

Today is National College Colors Day!!
