

Problem of the Day: Solve the equation.

$$-9x + 6 = 2x - 5$$

$$x = 1$$

$$-9 \cdot 1 + 6 = 2 \cdot 1 - 5$$

$$-9 + 6 = 2 - 5$$

Plan for the Day: Daily integer quiz update

Finish circuit (if needed)

$$-3 = -3$$

Choose My Grade activity - due Friday

TEST TOMORROW!! Circuit and Homework

Week 2 due tomorrow!!

Objective: We will be able to solve equations with variables on both sides.

Today is National Wildlife Day!!
